International Workshop on Remote Sensing and Geographic Information System in Archaeology

01-07 December 2017

Remote Sensing (RS) and Geographic information system (GIS) are two information technologies that have transformed the ways archaeologists conduct research and contribute to society. In the past two decades, these information technologies have had tremendous effects on research techniques specific to archaeologists. This workshop aims at offering a multidisciplinary approach on Remote Sensing (RS) and Geographic information system (GIS) applied in Archaeology. The whole programme is divided in two parts. In Part I (morning sessions), experts will present RS and GIS techniques applied in archaeological research, both in the field and beyond. In Part II (afternoon sessions), participants will have the opportunity to practice and become familiar with these techniques used in modern archaeological research.

Participation Details

- Registration Fee is Rs. 2000/- per person (Registration Fee will be collected on the day of commencement of the workshop).
- Participants will be provided with registration kit, food and hostel/dormitory type of accommodation.
- If the participants can bring their own laptops (not must) it will be convenient for them to do practical sessions.
- Participants are requested to send Registration Form (soft copy) on or before 15.11.2017 to the e-mails given below.
- On completion of the Workshop certificates will be given to all participants.
- The detailed programme/sessions will be communicated later.
- Please book your journey tickets to Thiruvananthapuram in advance.
