UNIVERSITY OF KERALA
(Re-accredited by NAAC with "A" Grade)
THIRUVANANTHAPURAM- 695 581

Email : johnsonr@keralauiversity.ac.in
Mob.9846416767

Dear,

It is our privilege to welcome you for the three day National Workshop on "Psychotherapeutic Intervention Strategies" organized by the Department of Psychology, University of Kerala, Thiruvananthapuram. This workshop will address the challenging issues in Promoting Mental Health through "Psychological Interventions".

Psychological interventions present themselves as indispensable option to ensure good health as well as quality of individual and community life. Therefore, we need to develop strategies and techniques capable of enhancing mental health intervention programs under current scenario. There is also a need to prevent or reduce the damaging influence of the busy and stressful life of present day on the functioning of an individual through the application of newly developed technologies. Mental health intervention strategies could be improved by making use of the recent advances in information and communication technology. The scientific study of Psychological intervention has thus become imperative to promote mental health. This scientific knowledge thus gained has to be shared with the mental health care fraternity so it will be benefitted to the public also.

The workshop will bring together the leading scientists and researchers from all over India to discuss the major issues and current developments in Psychological intervention practices and Research in promoting mental health. Faculty members and research scholars are encouraged to present their original research work or new innovations in this topic. The programme is also designed to cater the Mental health Professionals. We hope that you will seize every opportunity to participate in this programmes. Please join us to enjoy the academic feast of scientific lectures from eminent faculties from institutions of National repute in the area of Psychotherapeutic Intervention.

With warm regards,

Dr. Johnson R
Organizing Secretary

UNIVERSITY OF KERALA AND DEPARTMENT OF PSYCHOLOGY

University of Kerala was established in 1937 by a promulgation of the Maharaja of Travancore, Sri. Chithira Thirunal Balarama Varma, the first Chancellor of the University. Kerala University is the mother University in Kerala and the Department of Psychology is one of the prestigious departments functioning from 1957 on ward under the faculty of Science. The Department has been offering M.Sc., M.Phil., and Ph.D. Psychology Programme. The department also organises various National and International conferences and Outreach programs for the public.

RELEVANCE OF THE PROGRAMME

In India the prevalence of serious mental disorder is affecting 70 million people. We are facing shortage of Mental Health Professionals and only a very few institutions offer the courses to bringout trained professionals. According to WHO guideline, for 5,000 people one trained clinical Psychologist should be there to manage Psychological disorders. But in India current ratio is 1:30000. We have only 7000 Psychology professionals and actual requirement is 54,750. Clinically trained Psychologists in India are less than 10 percent of the total needs. None of the Institutions offer short term or special training programme for clinical skills development or primary care of Psychological disorders. In this context, it is very essential to conduct programs to focus clinical skill development to better quality management of psychological problems with the assistance of well known Psychological intervention experts from reputed institutions of National importance to share their Scientific approaches in Psychological intervention strategies in the management of mental health problems. Apart from the theoretical knowledge latest practical knowledge will also be imparted to the participants.

Objective of the programme

- To provide hands on knowledge in the management of Mental Health Problems
 - To focus all aspects of Psychological theories in various mental health problems
 - To share the best practices in Psychosocial management
- The programme would target Academicians, Mental health professionals and Research Scholars in Psychology

Subject Areas

Techniques in Psychotherapy, Behavior Therapy, Paediatric Psychology, Clinical hypnotherapy, Neuro Psychological assessment and intervention, Forensic Psychology and Interrogation Techniques.
